## Relationship between Business and Biodiversity

Calculating the ecosystem impact ratio at each stage from the results of LCA when the total impact per product is 100. (Life cycle inventory database: IDEA Ver. 2.3)

Inputs and outputs include indirect ecosystem impact factors.

## Risks

Impacts of inputs and outputs on ecosystem

Climate change

**Pollution** 

Biological resource loss

Habitat loss

Invasive alien species

## Contributions

Ecosystem conservation activities to reduce impacts

Greenhouse gas reduction

Chemical substances Resource circulation

Forest protection Support for Cool Earth

Habitat protection Brother's Forest Gujo Ecosystem restoration project

**Endemic species** protection
