## Fiscal Year 2020 (ending March 31, 2021)

## First Quarter Results

(3-month results ended June 30, 2020)

## Brother Industries, Ltd. <br> August 4, 2020

> Information on this report, other than historical facts, refers to future prospects and performance, and has been prepared by our Management on the basis of information available at the time of the announcement. This covers various risks, including, but not limited to, economic conditions, customer demand, foreign currency exchange rates, tax rules, regulation and other factors. As a result, actual future performance may differ from any forecasts contained on this report.

## Results for FY2020 Q1

## $\checkmark$ Revenue and profit were down mainly due to the impact of spreading COVID-19 infections

- In communications and printing equipment, increased demand in the SOHO segment from an increase in people working from home could not make up for the decrease in PV in the SMB segment
- In the P\&H business, sales increased, mainly in mass-market equipment as demand for handmade was spurred
- Demand for garment printers grew, but demand for industrial sewing machines remained sluggish
- In machine tools, despite the effects of spot orders for the IT industry, demand in the automotive and general industries was sluggish
- In the N\&C business, there were considerable losses due to closure of karaoke locations and declining demand for commercial online karaoke machines

## Forecast for FY2020

$\checkmark$ While results are expected to partially recover over the second half, the tough management environment will continue

- In the P\&S business, despite increased demand from more people working from home, profit is expected to decrease due to a decline in PV in offices and the effects of delays in supplies
- In the N\&C business, results are expected to slowly recover in the second half, but significant losses are anticipated as demand will not recover to pre-COVID-19 levels
- Since performance is expected to deteriorate severely, the annual dividend for FY2020 will be 34 yen.

## Consolidated Results for FY2020 Q1

Under a harsh business environment attributable to confirmed cases of COVID-19, revenue and profit were down in Q1
(100 Millions of Yen)

## Demand decreased and revenue was down in almost all businesses due to the impact of COVID-19

(100 Millions of Yen)

at your side
Restrictions on business activities due to COVID-19 had a dampening effect on SG\&A expenses, but they were not enough to offset the decline in sales, so profit decreased significantly
(100 Millions of Yen)

Revenue and profit for FY2020 are expected to decrease amid a harsh business environment
(100 Millions of Yen)

## Printing \& Solutions

## Demand trends: Demand is expected to slowly recover over the end of the fiscal year

- Demand increased for small office equipment for home/SOHO segment, due to increasingly more people working and learning from home (mainly low-end IJP, LBP products)
- Demand for both hardware and consumables was sluggish in Q1, especially for SMB segment, due to offices being closed as countries go into lockdown
- While demand is expected to recover slowly as economic activity resumes following the lifting of lockdown measures, it will not recover to pre-COVID-19 levels
- Growing demand from people working and learning from home is expected to run its course
- PV of office printers is expected to decrease as more people work from home

## Performance outlook: Decrease in revenue and profit is expected due to decline in office PV and effects of delays in supplies

- Although demand grew for the SOHO segment due to more opportunities for people to work from home, PV for the SMB segment decreased. In addition, there were delays in supplies. As a result revenue and profit decreased.
- Production had recovered largely to pre-COVID-19 levels as of the end of July
- It is expected that demand will gradually recover, but sales and profit in Q2 and beyond will be affected by decrease in PV of office printers and lost opportunities due to delays in supplies
- In the SMB segment, severe conditions are expected for both hardware and consumables throughout the year, affected by the decrease in office PV resulting from more opportunities for people to work from home
- In emerging countries (excluding China), severe conditions are expected throughout the fiscal year with projections for fragile infrastructure, a deficient e-commerce base, and an underlying spread of infection

## Printing \& Solutions Business Segment Profit (Results for Q1 \& Outlook for Q2-Q4)

at your side

## Results for Q1

- Although demand increased for the SOHO segment due to people working from home, PV for the SMB segment decreased and there were delays in supplies. As a result revenue and profit decreased.
- Although restrictions on business activities drove expenses down in Q1, sales decreased, and the resultant significant decrease in marginal profit primarily on consumables could not be absorbed

## Outlook for Q2-Q4 (Jul-Mar)

- Although demand is expected to gradually recover, revenue and profit are expected to be down due to a decrease in PV primarily for the SMB segment, together with lost opportunities due to delays in supplies
- While sales promotion expenses are likely to be considerably reduced in Q2 and beyond, it is expected that expenses will be higher due to higher fixed costs associated with the resumption of business activities and an improvement in factory operation rates, as well as an increase in air transportation expenses in response to delays in supplies
